

# Damage Location Worksheet

In the event of complete destruction of buildings it may be impossible to determine locations by address. Use this form to sketch in lots where damage occurred. Please label streets and assign numbers to each lot to refer to specific level of damage. Please draw an arrow to indicate NORTH.

The form consists of a large central rectangular area for sketching, bounded by lines representing streets. The top and bottom boundaries are horizontal lines, while the left and right boundaries are vertical lines. There are also small L-shaped corner markers at the top-left, top-right, bottom-left, and bottom-right corners of the sketching area, likely intended for labeling or marking specific points.
